

ETC FusionHD[™]

Context of Patient Care

ETC FusionHD[™] creates a more valuable simulation experience by fusing audio and video with data generated from other simulation devices, creating a context of patient care.

Customizable and scalable: Contact a KbPort[™] sales representative for details.

Simulate, educate, improve.

ETC FusionHD™

Recording / Debriefing Software

ETC FusionHD™ makes it easy to capture the data of Gaumard®, Laerdal™, Simulaids, and CAE™ manikins live, in real-time, without the need to import files after. ETC Fusion HD™ is a web-based recorder with live video streaming and instantaneous debriefing from anywhere.

The newly redesigned ETC FusionHD™ interface is easy to manage and navigate. Collapsible menus and expandable video inputs make the interface customizable to user preferences. The redesigned file library allows for easy navigation through saved videos. ETC FusionHD™ records in high-definition, resulting in crisp images for detailed video debriefing.

Features:

Records live, in real time

Enriches learning experience

User friendly

- Clickable events
- Clear user interface
- Customizable

Realistic

- Connects all parts of the simulated environment

Cross platform compatible

- To highest fidelity manikins
- With Windows, Android, Mac

In any simulation environment, realism, usability, data accuracy and accessibility are key. ETC FusionHD™ and its powerful and comprehensive integrations, brings unparalleled realism to the simulation lab for the most effective education possible.

Simulaids™ is a trademark of Simulaids, Inc. KbPort LLC is not affiliated with Simulaids, Inc.
CAE™ is a trademark of CAE Healthcare. KbPort LLC is not affiliated with CAE Healthcare.
Gaumard® is a trademark of Gaumard® Scientific. KbPort LLC is not affiliated with Gaumard® Scientific.

Cap•ture

/ˈkɑp-cher/

verb

The act of recording in a permanent file.

To emphasize, represent, or preserve (something, such as a scene, mood, or quality) in a more or less permanent form

“KbPort™ ETC FusionHD™ will link, capture, and display in real time the vitals and log information of the most popular, high-fidelity manikins.”

Redefining Recording

KbPort™ was the first company in the medical simulation industry to offer a digital mobile recording and debriefing solution. Our ETC FusionHD™ provides high-definition audio and video that is easy to use, quick to set up, and simple to deploy. User-friendly recording and debriefing software, ETC FusionHD™, also fully integrates with the complete line of KbPort™ simulators as well as other simulation devices, such as SimPad® PLUS.

The power to practice safely in a simulated environment allows learners to gain crucial life-saving skills at no risk to patients. The integration of problem-solving abilities and simulation practice helps learners achieve the utmost competence to continue to improve the lives of patients and reduce medical errors throughout their careers.
